Dogger Bank Offshore Wind Farms

Welcome

Dogger Bank Wind Farms consist of three offshore wind farm projects, Creyke Beck A and B, and Teesside A, located around 130km off the North East coast. Each project will have a capacity of up to 1.2GW.

Who are we?

In August 2017, new ownership arrangements for the wind farms were announced. SSE and Equinor have each taken a 50% share.

SSE plc is one of the UK’s leading energy companies, involved in producing, distributing and supplying electricity and gas in a reliable and sustainable way. SSE is maintaining and investing in a diverse and sustainable portfolio of generation plant, with the aim of having a portfolio weighted towards gas and renewables by the end of the decade. As of the end of March 2018, SSE had a renewable capacity across Great Britain and Ireland of approximately 3.8GW.

Equinor (formerly Statoil) is an international broad energy company committed to long-term value creation in a low carbon future. Equinor has a broad portfolio of oil, gas and wind assets in the UK. It is the largest offshore oil and gas operator in Norway and is one of the world’s largest offshore operators, and a growing force in renewables. With active investment in new energy such as offshore wind, Equinor currently has 750MW of installed offshore wind capacity in production in the UK, and 385MW under construction in Germany, at the E.ON-operated Arkona project.
